

ECONAMID® ORO

Besides the standard **ECONAMID®** grades, **DOMO EP** has now developed a new product line.

These new products grant excellent mechanical and aesthetical properties, getting really close to prime grades performances.

Thanks to its exceptional properties, **ECONAMID® ORO** will open a brand new chapter within the industrial PA6 grades applications field.

Comparing these characteristics with standard rPA6 and **DOMAMID® GR** ranges, a consistent increase in mechanical performance is more than evident.

A big step ahead has been made also in color choice development.

ECONAMID® ORO will be available especially in natural color.

Its higher viscosity makes it particularly effective for high thickness applications.

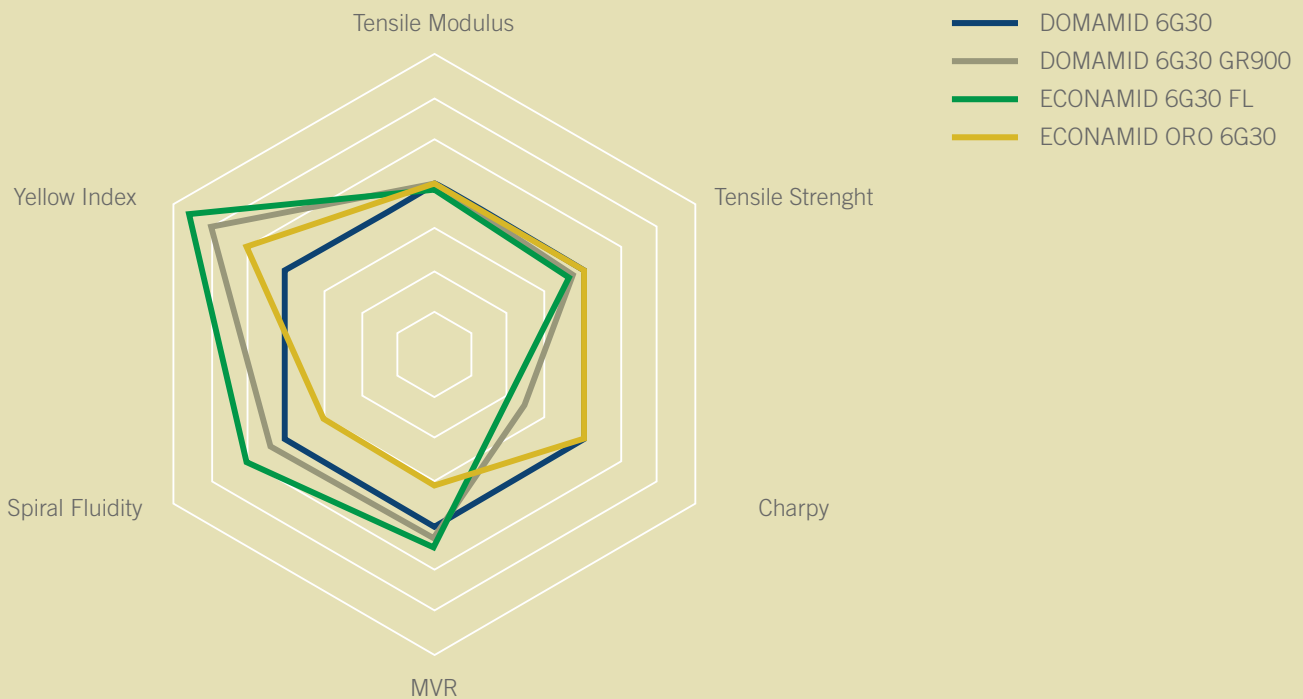

ECONAMID® ORO

Discover new DOMO ECONAMID® ORO!

- *100% from film feedstock*
- *Unfilled & glass fibre reinforced PA6 compounds*
- *Excellent mechanical properties*
- *REACH & RoHS compliance*
- *High quality consistency*
- *Available natural and colored*
- *Titanium free*
