

Our MARKET SECTORS

INDUSTRIAL & CONSUMER GOODS Industrial bags

Packaging System
Pre-made bags

Typical Structure:
PET/ALU-Foil/BOPA/PE

Material	Description / Features
FILMON® BXB	<p>A variety of sensitive industrial/agri/horti products, either powder, paste or granular, such as fertilizers, pesticides, fungicides, polymers, bitumen, foods, chemicals and many others, can be safely protected and delivered in the bags strengthened by FILMON®.</p> <p>FILMON® prevent the ALU-Foil from pin-holing and flex cracking, grants the desired protection to the content.</p> <p>The enhanced mechanical resistance and flexibility provided by the double-bubble process, together to the high degree of surface tension of the film, will improve the robustness of the bags, especially at the heat sealed sides.</p>
