

**The strength of chemicals.**

Premnitz 07/30/2018

**Subject: Compliance with the REACH Regulation EC 1907/2006 (European Regulation for Registration, Evaluation and Authorisation of Chemicals).**

Dear Customer,

we would like to inform you that DOMO Engineering Plastics GmbH is in compliance with the requirements of the REACH Regulation (EC 1907/2006) regarding the timing and the procedures that are relevant to our products.

According to REACH our compounds are considered as preparations that are mixtures of multiple substances. If a product contains hazardous substances according to article 31, DOMO Engineering Plastics GmbH is providing a CLP compliant safety datasheet.

As a downstream user of substances and preparations, called raw materials, DOMO Engineering Plastics GmbH does cooperate with its own suppliers in a communication chain according to articles 32 to 34. During registration of raw materials their status according to REACH and the SVHC candidate list is examined. In case of status changes our raw material suppliers are obliged to inform us.

Based on the information received from our suppliers, we can communicate that all used raw materials are either exempted, registered or pre-registered. Substances listed in the REACH annexes and the latest SVHC candidate list (<http://echa.europa.eu/candidate-list-table>), are not present or below their respective concentration limits.

Don't hesitate to contact us for any further information.

Best Regards,

**DOMO ENGINEERING PLASTICS GmbH**
