

LET'S DRIVE THE FUTURE OF CARS TOGETHER!

Get ready for tomorrow by accelerating the mobility transformation with DOMO. DOMO is your reliable partner for high-quality engineered materials that enable you to successfully drive the automotive future.

EVERYTHING YOU NEED TO TAKE THE LEAD

From innovative PA6- and PA66-based solutions for lightweighting to a large range of flame retardants, color-coded and high-purity materials for safe e-mobility: Our products put you in the driver's seat of automotive innovation.

LIGHTER IS STRONGER

A wide range of high-viscosity and highly filled materials designed for metal replacement and vehicle efficiency.

HUB ADVANCED SERVICES FOR SUPERFAST INNOVATION

YOU think BIG and *fast*? We support your acceleration with a platform of interconnected advanced services including predictive simulation, 3D-printing and parts performance testing.

HUB by Technyl is your high-speed innovation pit stop for transforming your challenges into your solutions.

YOUR CHALLENGE

EFFICIENT DESIGN

- Topological optimization and function integration
- Integration of processing requirements
- Injection part analysis and mold design support

PREDICTIVE SIMULATION

- Numerical validation of new design
- Behavior models for realistic testing conditions
- Ready-to-use integration into Digimat software

FAST & FUNCTIONAL PROTOTYPING

- 3D-printing of functional parts using SLS and Sinterline® Technyl® PA6 powders
- Functional demonstrators and prototypes
- Accurate part dimensions

FLEXIBLE PART TESTING

- Tailor-made part testing
- Performance validation of application design
- 15+ test benches

YOUR SOLUTION

TOGETHER ON THE ROAD TO SUSTAINABLE MOBILITY

Sustainability has become one of the most important drivers of today's mobility. For this reason, we have developed responsible solutions for improving the environmental footprint of new vehicles. Let's close the loop in global mobility and steer towards a more circular automotive economy!

BECAUSE CARING IS OUR FORMULA WE CARE FOR CLEAN MOBILITY

DOMO Chemicals is a leading provider of polyamide-based engineered solutions that is highly integrated and committed to making tomorrow more sustainable.

Caring is our formula! By turbocharging your speed of innovation we shape the mobility of the future with you.
